PARTNER PROGRAM

ABOUT THE REAL GOLD COMPANY

IT HAS BEEN RUNNING
SINCE 2015

AUSTRIA

SOUTH AFRICA

SERVICE CENTER
IN HUNGARY (BUDAPEST)

UAE
(DUBAI)

REAL GOLD 2.0 is a program for the sale of gold bars of the highest grade 999.9 focused on the sale of the lowest weight bars of 0.10 grams with LBMA certification from well-known gold producers.

The purchase and control of bars, as well as the distribution of commission fees under the REAL GOLD 2.0 marketing program takes place through the smart contract of the TRON blockchain.

WHY GOLD?

THE MOST RELIABLE FORM OF MONEY IN THE WORLD

LIQUID

Gold is a market of 12 trillion US dollars

INSTANT SALE

Get competitive gold prices in every city on the globe

ETERNAL

Timeless gold does not corrode or degrade

DISTRIBUTION

Public and private ownership of gold is commonplace all over the world

PRECIOUS

Gold has been used in jewelry and luxury items for thousands of years

INDUSTRIAL USE

Gold is used in electronics and many other industries

GOLD BARS OF 0.10 G

WHY IS IT BETTER TO BUY SMALL GOLD BARS?

Buying small gold bars does not compromise any of the major benefits of gold: they are portable, private, liquid and will be relevant forever.

1

LARGE BARS DO NOT IMPLY DIVISIBILITY INTO SMALLER ONES

When you sell a large bar, you are liquidating a significant personal investment. It is more practical to sell multiple small bars to exchange the exact amount of gold for the exact amount of money you need

2

MORE POTENTIAL BUYERS

Not many investors can afford to buy a bar of, say, 5 or 10 g. There are more potential buyers for the purchase of small bars, light weight bars are more accessible. In fact, having some gold is better than not having it at all

3

REDUCING THE RISK OF FORGERY

Counterfeiters prefer large bars as their cost is much higher

4

THERE IS NO NEED TO ANALYZE THE BAR

The larger the bar, the more likely it is that the purity analysis will take longer prior to selling. The analysis adds additional costs, it is inconvenient and will delay payment

5

SMALL BARS

Small bars are also a wonderful gift for any occasion

REAL GOLD 2.0 BLOCKCHAIN

The REALGOLD 2.0 program is a combination of the most ancient, reliable, stable asset with a constantly increasing value, gold, and decentralized blockchain technology.

The blockchain technology allows for a high level of transparency and ease of audit, and participants receive a permanent and immutable proof of ownership, a record of the entire supply chain and storage.

REALGOLD 2.0 PUBLIC BLOCKCHAIN TECHNOLOGY

SCALABLE

Easy online distribution, deployment and network effects

IMMEDIATE

Almost instant settlement of trades

PUBLIC

Fully verifiable proof of gold bar reservation and transaction history

DISTRIBUTED

Resilient, secure and reliable network infrastructure

REAL GOLD USDT

The REAL GOLD 2.0 program works on the most progressive TRON blockchain, operates on the USDT stablecoin, where 1 USDT = \$1. It is the binding to the stablecoin that provides stable and secure operations and profits unlike smart contracts, which operate on coins whose exchange rate can fall or rise sharply.

$$1 \text{ USDT } \text{⚡} = 1 \text{ \$ } \text{💰}$$

SMART CONTRACT REAL GOLD 2.0 USDT

The REAL GOLD 2.0 platform is based on the smart contract technology.

REAL GOLD 2.0 smart contract

The main purpose of the smart contract is the instant automatic distribution of funds from incoming transactions to the wallets of participants of the REAL GOLD 2.0 program in accordance with the terms of the marketing program.

PERSONAL WALLET

To become a member, you need to have or create your own personal cryptocurrency wallet.

Detailed instructions can be found here:

 [HOW TO CREATE A TRONLINK WALLET ON PC](#)

Reference in the REAL GOLD 2.0 smart contract:

Your referral link remains unchanged, you cannot change your superior partner, as well as your subordinate partners are permanently assigned to you in your structure.

ONLY YOU HAVE ACCESS TO YOUR FUNDS

All commission fees are instantly deposited
into your personal wallet in accordance
with marketing

All information about transactions
is stored in the public domain in
the blockchain

You can easily check each
transaction and see where the
funds were sent

MARKETING OF «REAL GOLD 2.0»

The REAL GOLD 2.0 USDT marketing is implemented on the technology of smart contracts of the TRON. In marketing, the USDT token is directly used in the BEP-20 format with a stable exchange rate equal to 1 USD.

USDT TOKEN

USDT is a cryptocurrency with a constant fixed exchange rate equal to 1 US dollar. It has a fully verified code and is approved by the New York State Department of Financial Services.

USDT is fully backed by the US dollar in a 1:1 ratio, it can always be exchanged for dollars or other fiat currencies.

The USDT token can be easily exchanged for any cryptocurrency on exchanges while spending a small commission from the network. To send a USDT token or any other one functioning in the TRON blockchain, you will need a certain amount of TRON to pay a fee. TRON is an internal coin of the TRC-20 format of the TRON blockchain, which is necessary to pay a transaction fee and to move any tokens.

The cost of activating levels and recycling on the REAL GOLD 2.0 platform is indicated in dollar equivalent.

1

GS5

GS7

GS15

GS31

Goldsets were developed for accounting and distribution of fees in the REAL GOLD 2.0 marketing. They are based on a matrix system and set up on the decentralized smart contract technology.

The participants' income is formed on the basis of inviting new partners to their team securing them forever, as well as through constant reinvestments and floating. All actions on the REAL GOLD 2.0 platform are recorded in the blockchain through a smart contract.

The program provides 4 types of Goldsets, differing in profitability and terms of interaction between partners. The most effective method of generating income is parallel activation and simultaneous use of all Goldsets.

The validity period of Goldsets is not limited.
Through activating any Goldset level once, it is
assigned to you forever and does not require
additional costs.

Each type of Goldsets has fifteen cost levels

REGISTRATION AND ACTIVATION OF GOLDSETS IN REAL GOLD 2.0

To initially activate goldsets, it is necessary to purchase gold bars of 0.10 g in the REAL GOLD LTD company. A necessary condition for participation in the REAL GOLD LTD program is the activation of the first Goldsets of all types of GS5, GS7, GS15, GS31 with the lowest cost. In total, it makes the activation of four types of Goldsets: 4 bars of 0.10 g each. One bar goes for each set.

1 2 3 4 5 6 7 8 9 10 11 12 13 14 15

GS5

GS7

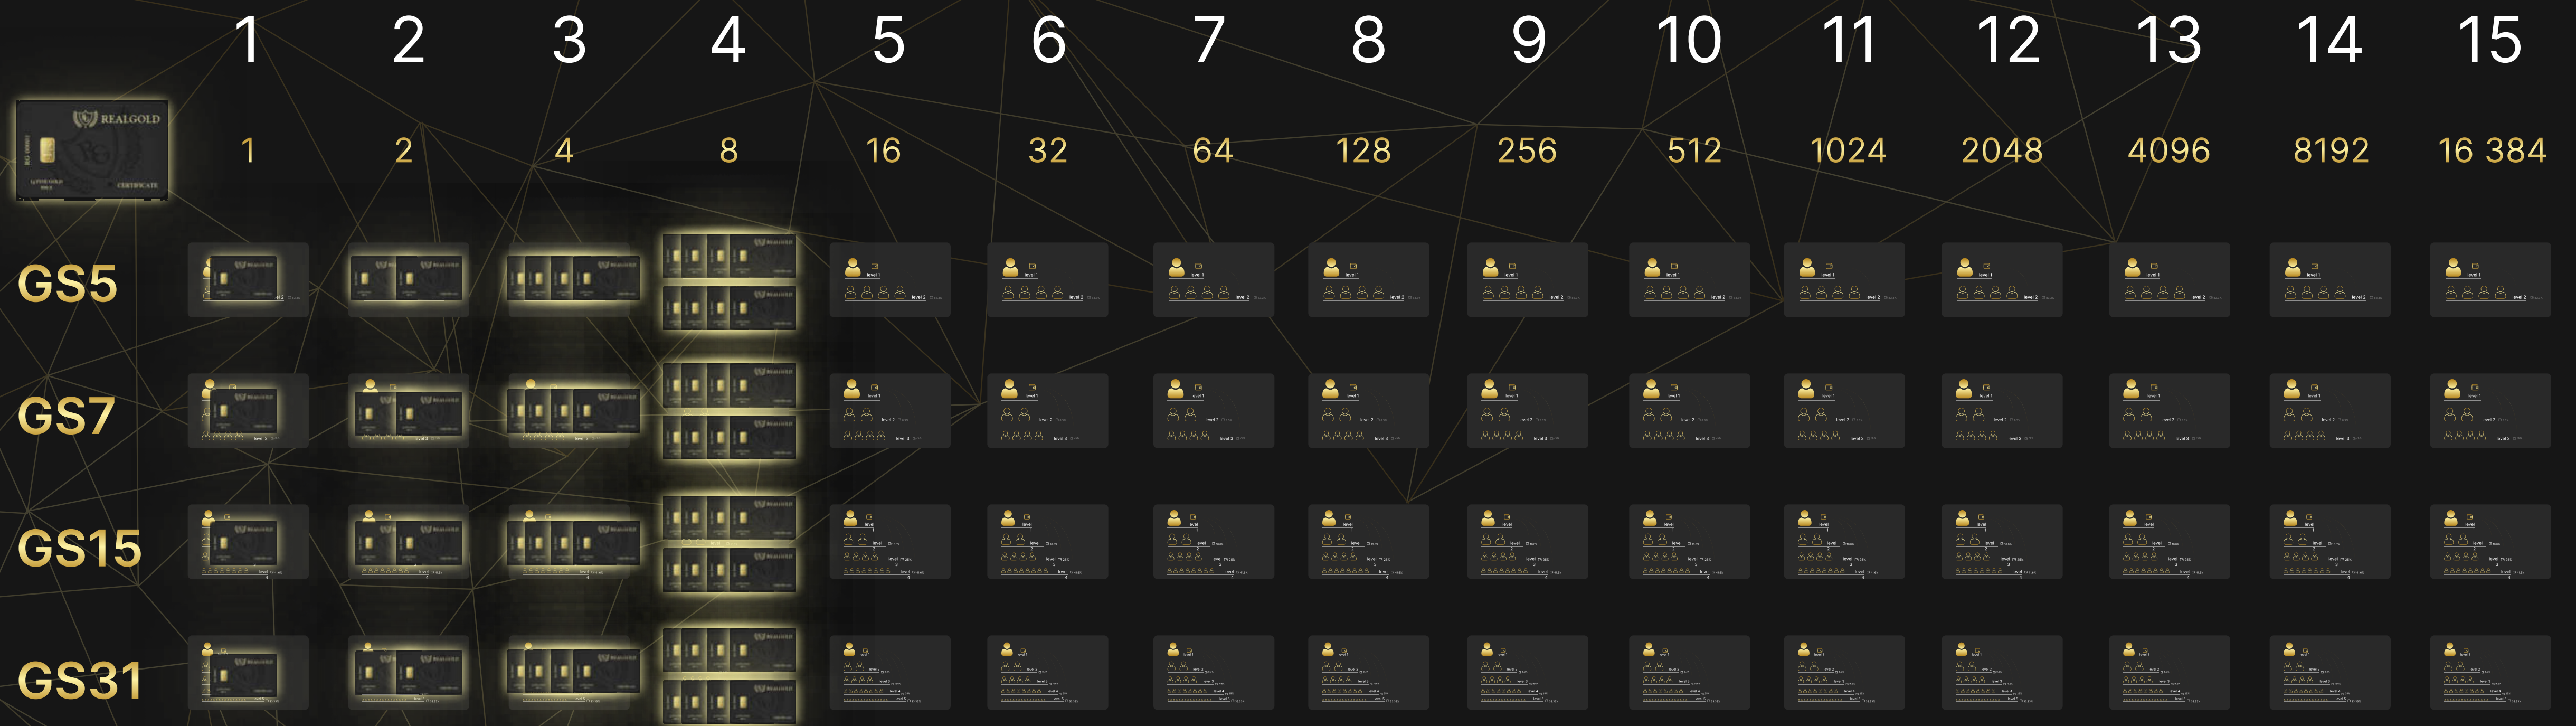

GS15

GS31

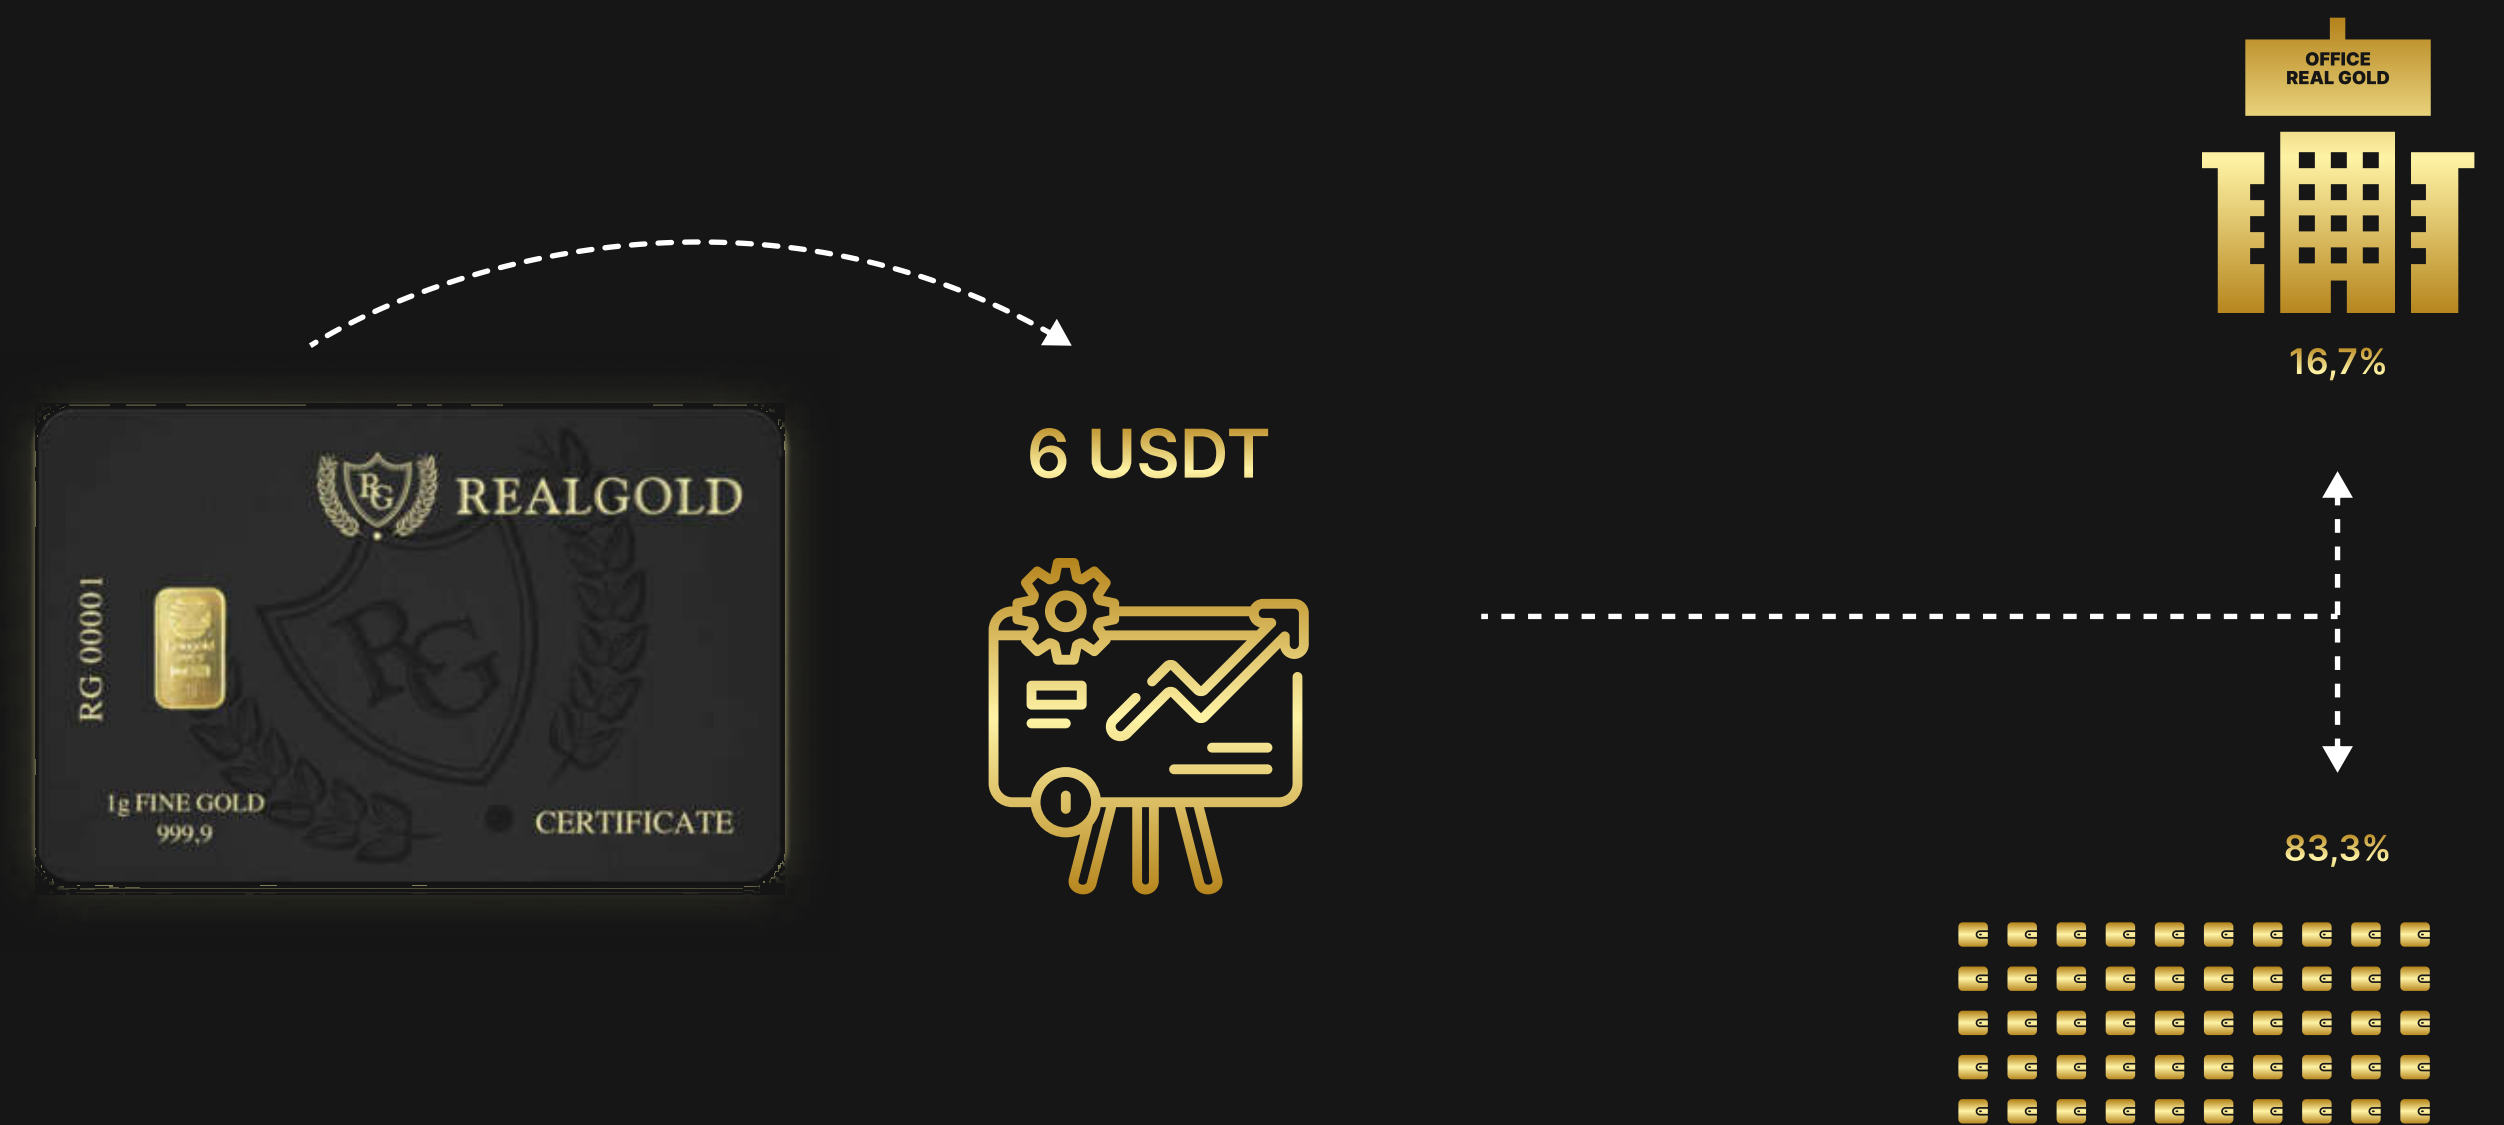

The cost of activating each next level, as well as income on Goldsets, is twice as much as the previous set.

For the first activation of each subsequent Goldset, the cost increases 2 times exactly compared to the previous one. The first set is one bar, the second is 2 bars, the third is 4 bars, the fourth is 8 bars, and so on.

All Goldsets subsequent by cost can be activated one by one, in ascending order.

The cost of marketing charges for each purchase of one gold bar is \$6 USDT; of this amount, 16.7% is the company's income, as well as 16.7% is the company's income for each reinvestment and each transition and activation of higher-cost Goldsets, and 83.3% is distributed according to the marketing plan to the participants of the REAL GOLD 2.0 program.

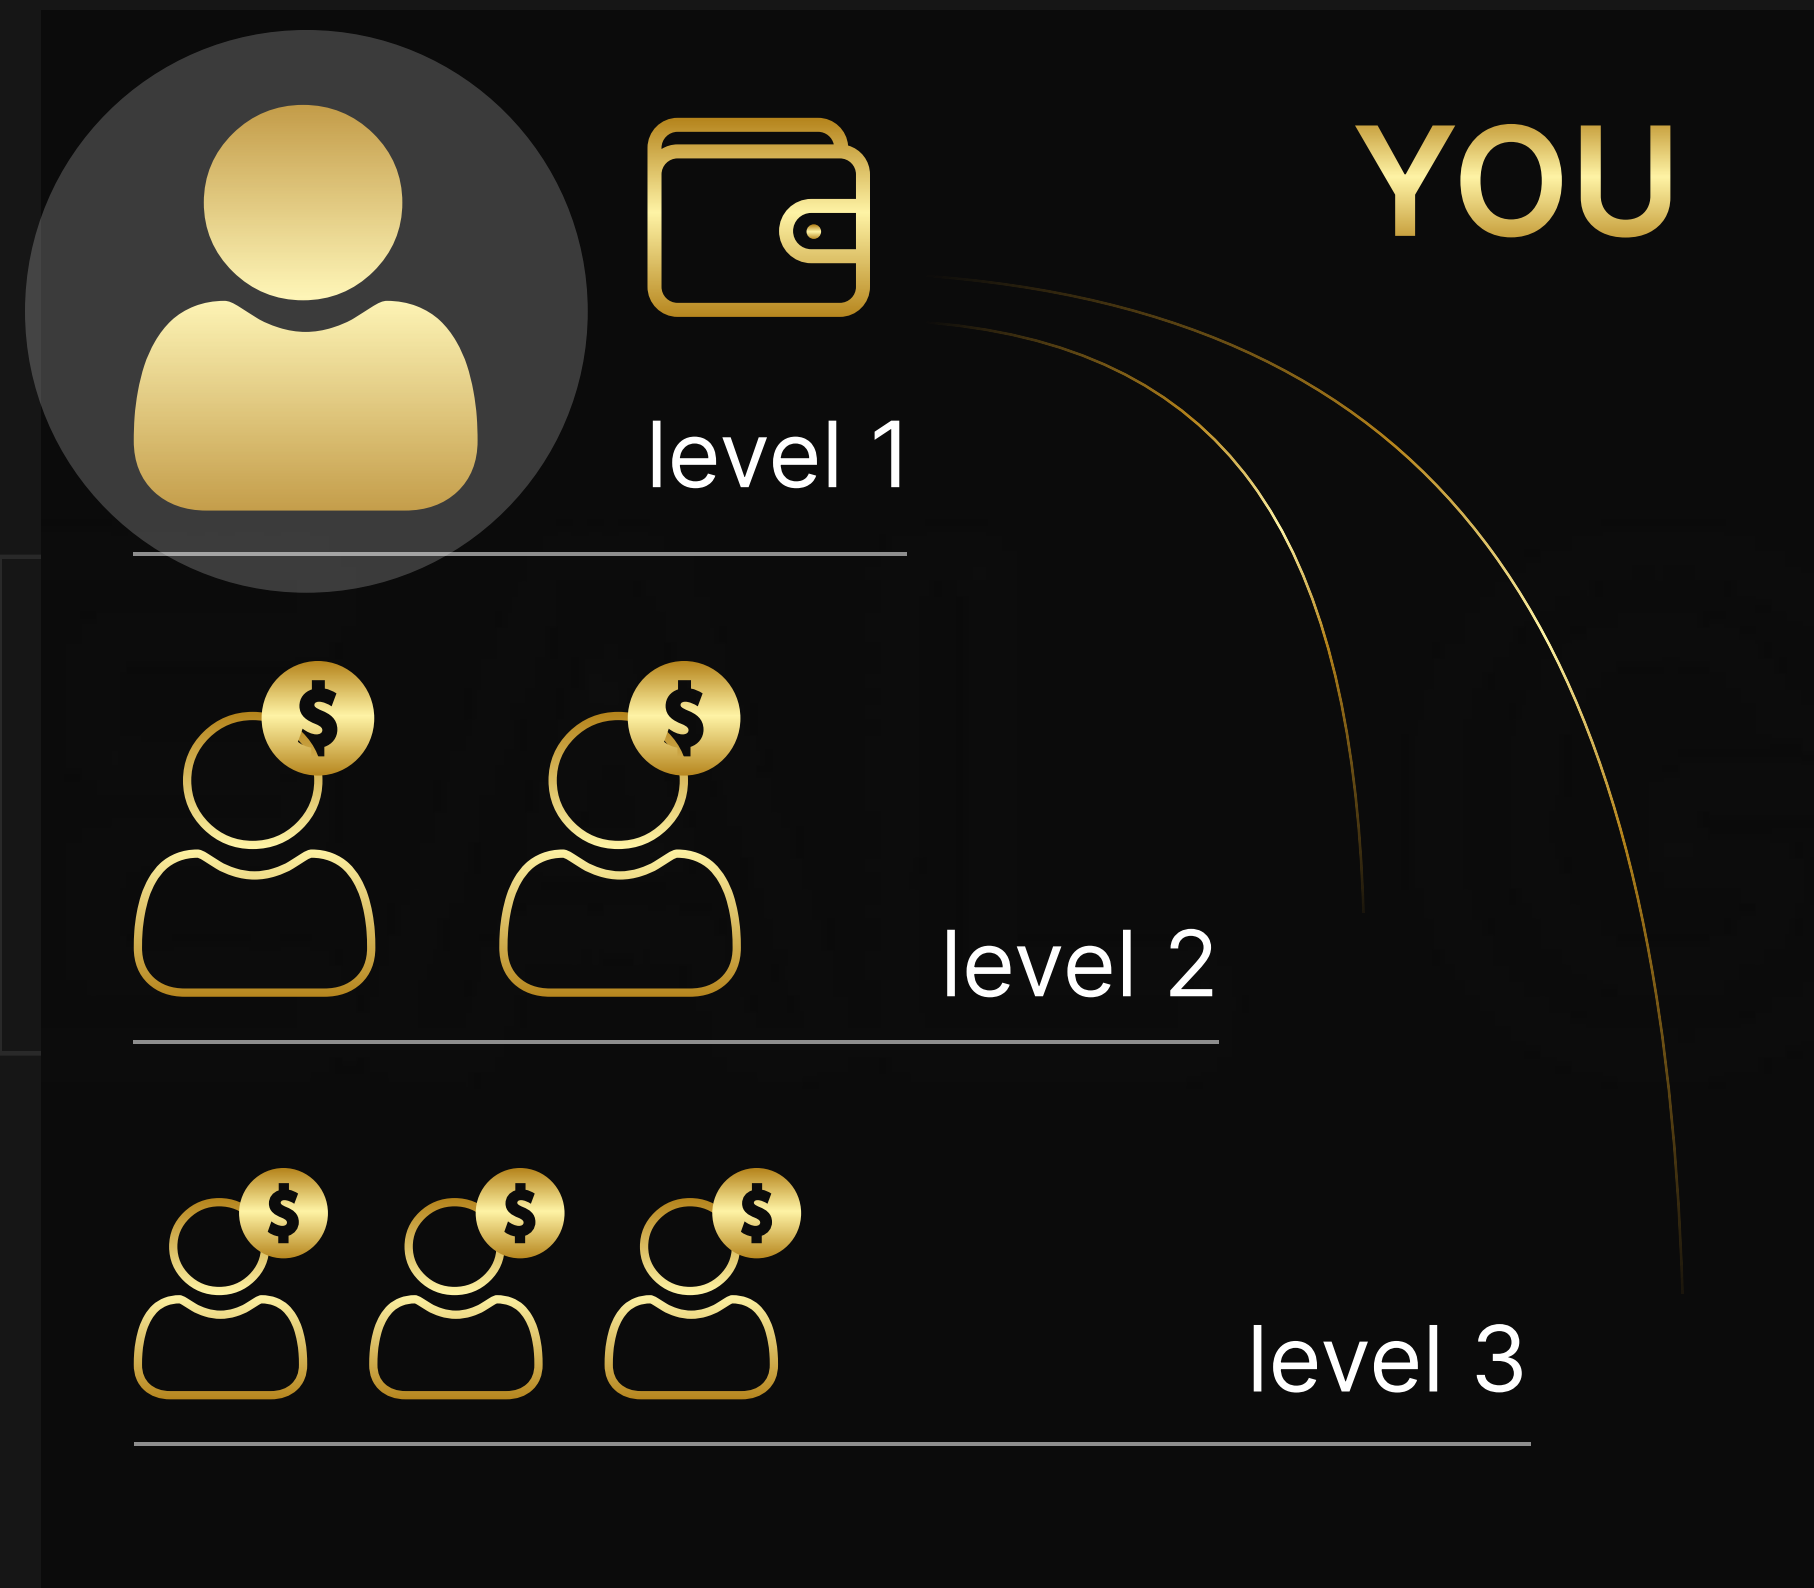

Through activating Goldsets of higher cost levels, you automatically increase your income. The income in the marketing program is formed from the cost of the Goldset in which your partners occupy places. Therefore, working at higher cost levels of Goldsets increases your total income by several times. The marketing plan is designed in such a way that the income from one cycle (filling the Goldset) is enough to move to the next cost level of the Goldset of same type and to the Goldset of exactly the same cost.

The transaction for the purchase of gold bars goes to the smart contract and it redirects funds to the personal wallets of the program participants, whose places are on these sets.

The income from all the partners' places is instantly transferred to the personal wallets of the program participants.

You take free places in your chosen Goldsets.

After choosing and paying, your Goldsets are activated and now you can invite partners using your personal referral link. Detailed registration instructions can be found here:

Automatic cycles are provided at all cost levels of Goldsets. Each type of Goldsets consists of a certain number of levels on which a fixed number of places are located. After all the Goldset places are filled, a new cycle will automatically start.

THE NUMBER OF CYCLES IS UNLIMITED

Once you activate the Goldset, it allows you to invite an unlimited number of new partners.

REFERRAL LINKING

All personal partners that you invite are assigned to you forever and it is impossible to change this since it is fixed in the blockchain through a smart contract.

GS5 GOLDSET - 5 PLACES

There are 15 GS5 Goldsets in total. The sets differ in cost, each subsequent one is twice as expensive as the previous one. The minimum activation of the smallest GS5 Goldset is one bar. Subsequent activations are with a doubling of the cost on each set.

GOLDSET GS5

2 levels

You

Level 1: You

You are always on the first level;

level 2 includes four places

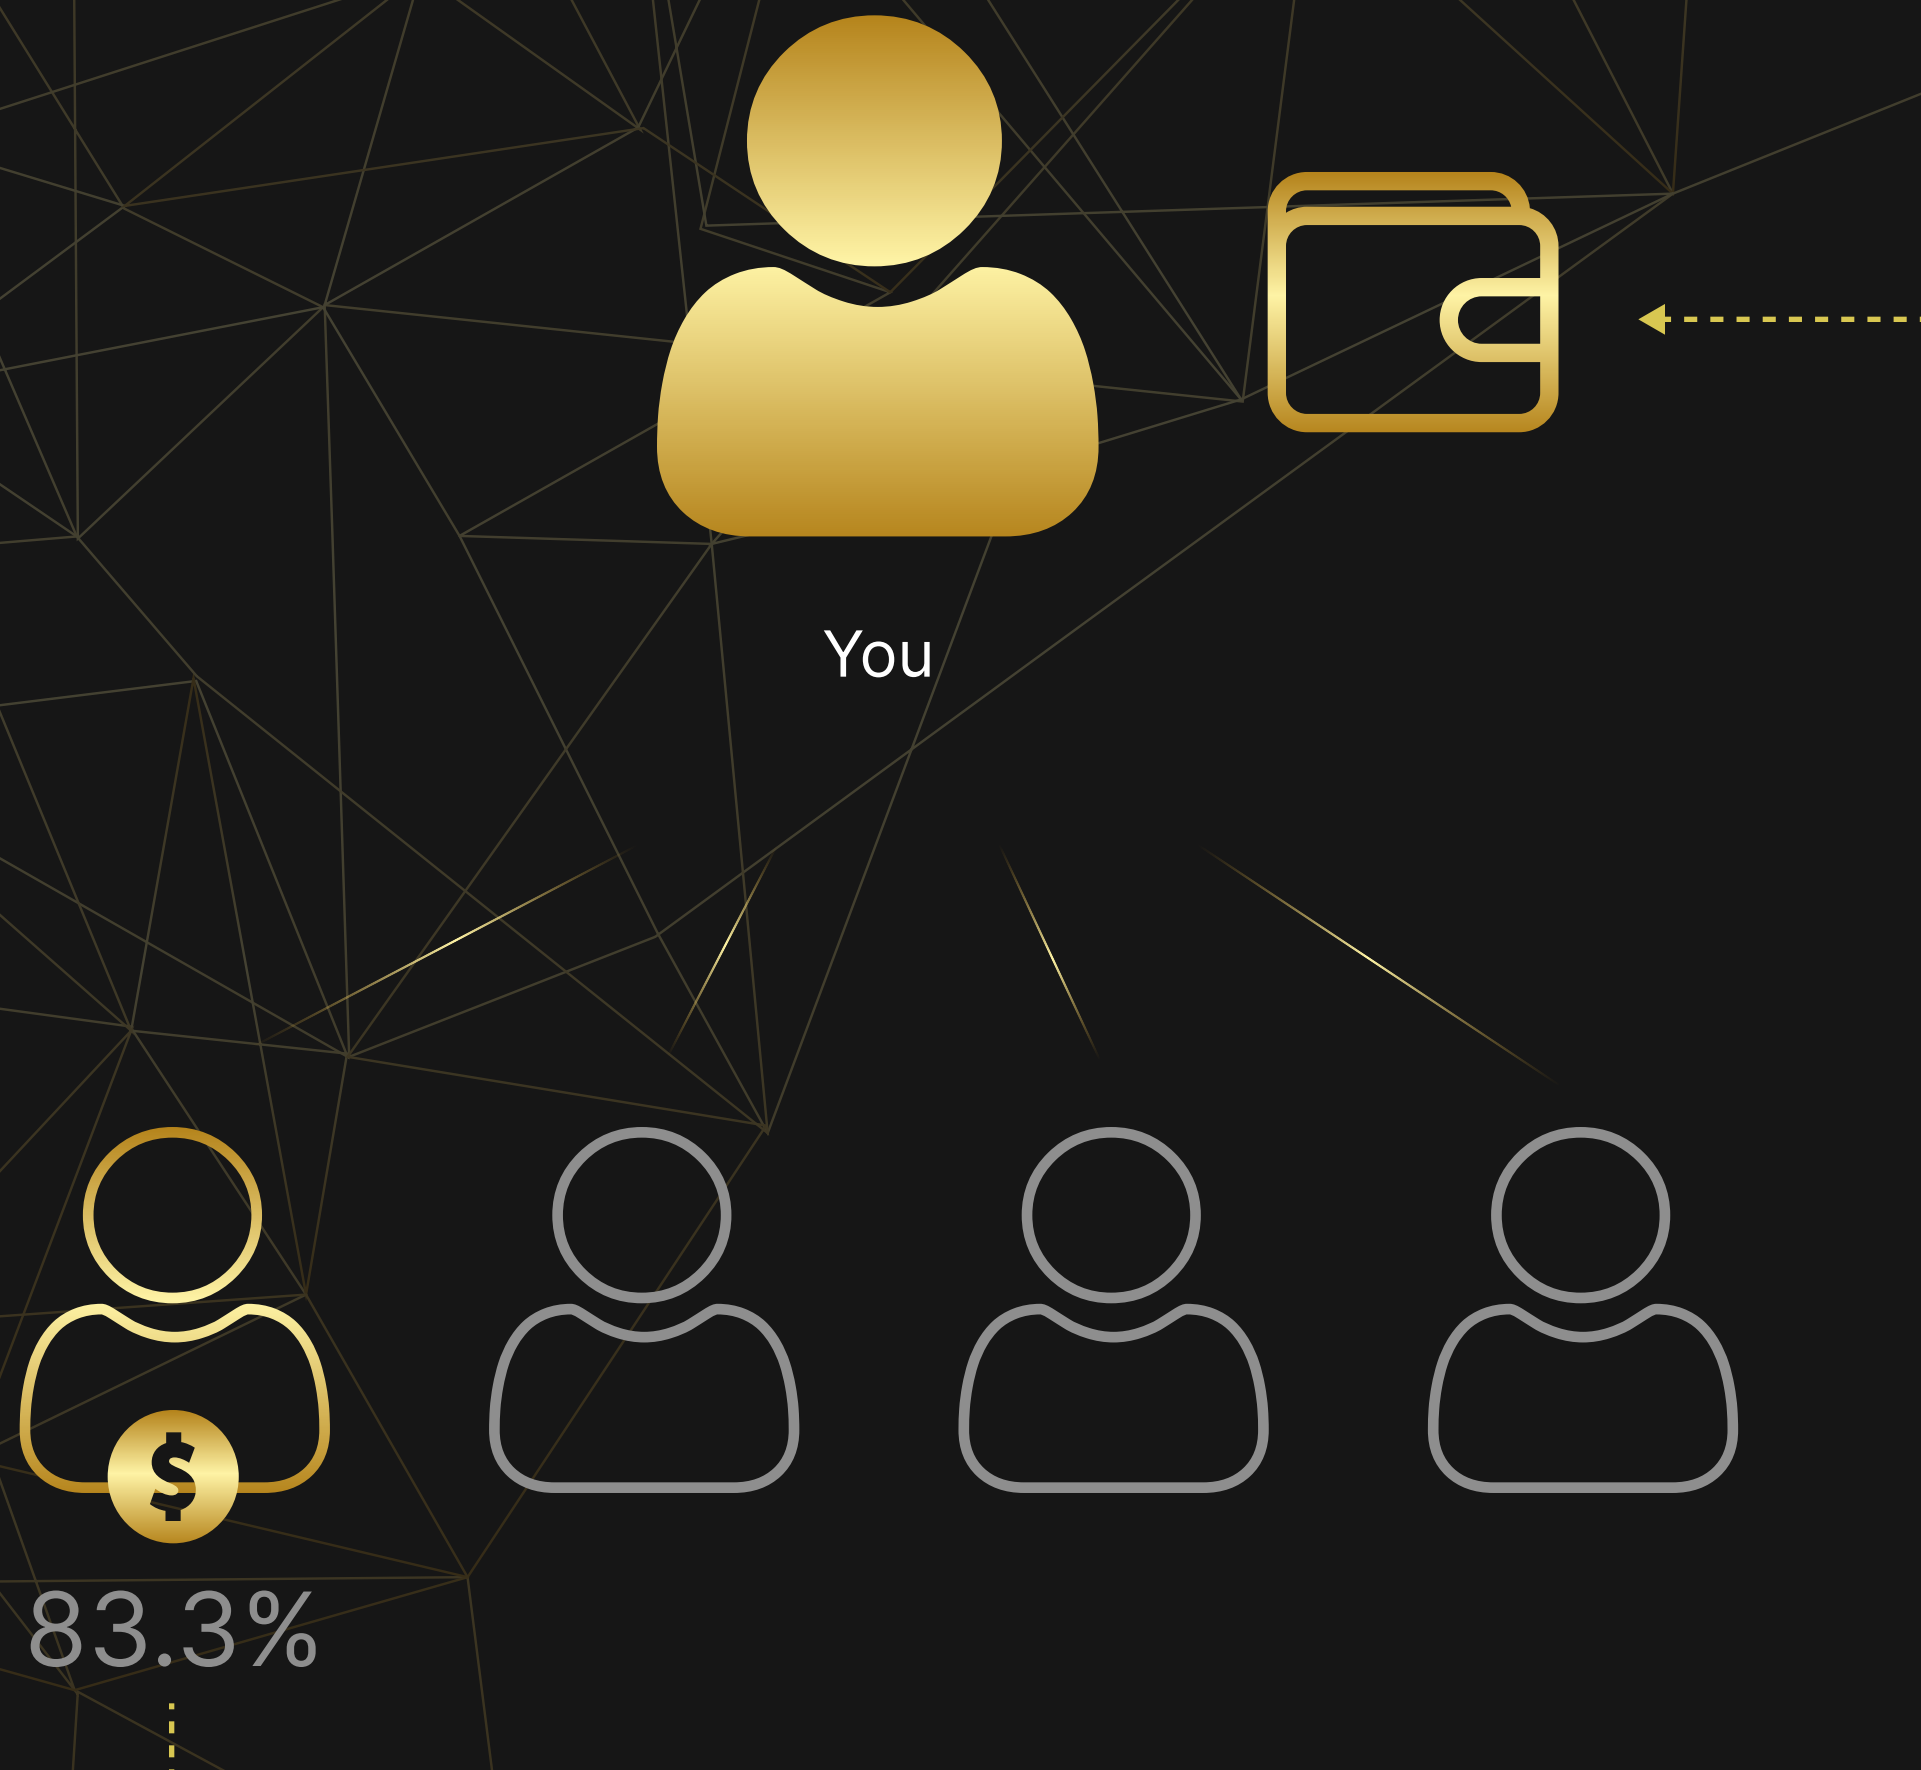

Net income of each cycle amounts to 333%.

 333%

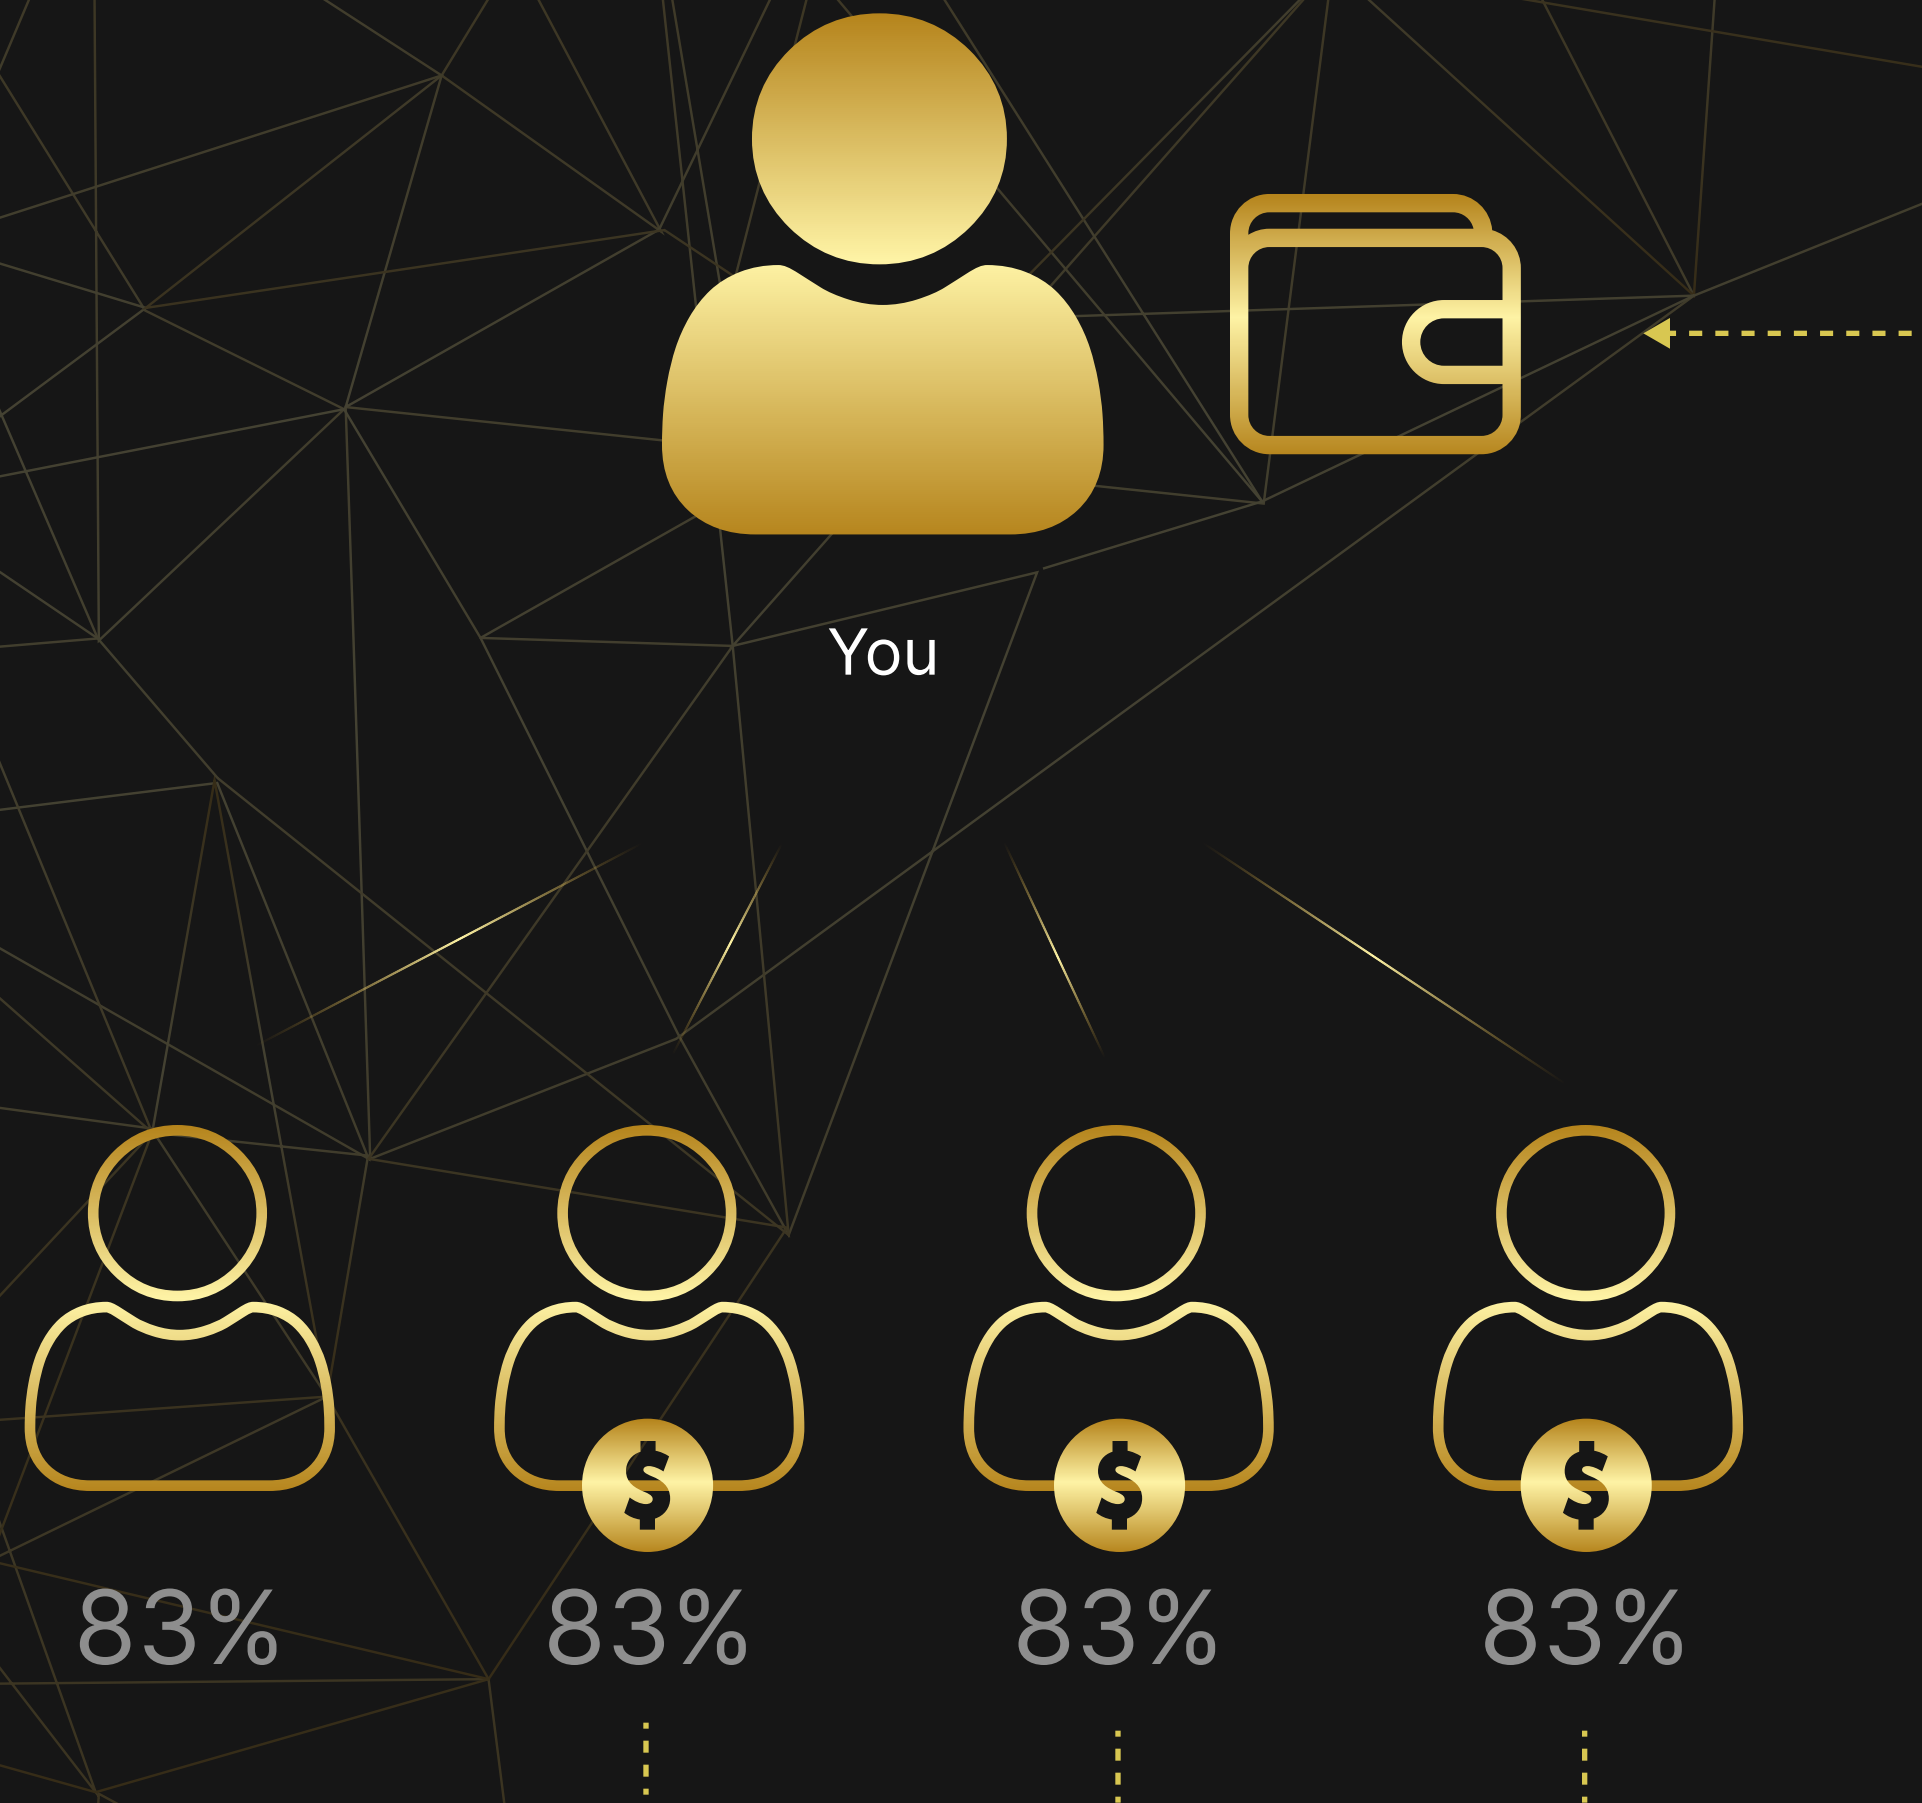

GOLDSET GS5

The distribution of rewards for completing each level of the program is as follows:

The first partner you invite takes the first place on the 2nd level from left to right below you. Your income will be 83.3% of the commission fees for the second level depending on the amount of the activation cost of each Goldset.

GOLDSET GS5

The second person you invite takes the second place below you and you also get an income of 83.3%.

The third partner takes the third place below you and again the income is 83.3%.

The fourth partner takes the fourth place below you and closes the first cycle. Your income is 83.3% of the commission fees depending on the amount of the activation cost of each Goldset.

GOLDSET GS5

When the GS5 of each cost level is filled for the first time, the last 4 places form a pool to move to the next cost level of the Goldset and to reactivate a Goldset of the same cost, reinvest, at the same time.

Reinvestment and transition to a higher cost level occur automatically when each Goldset is fully completed.

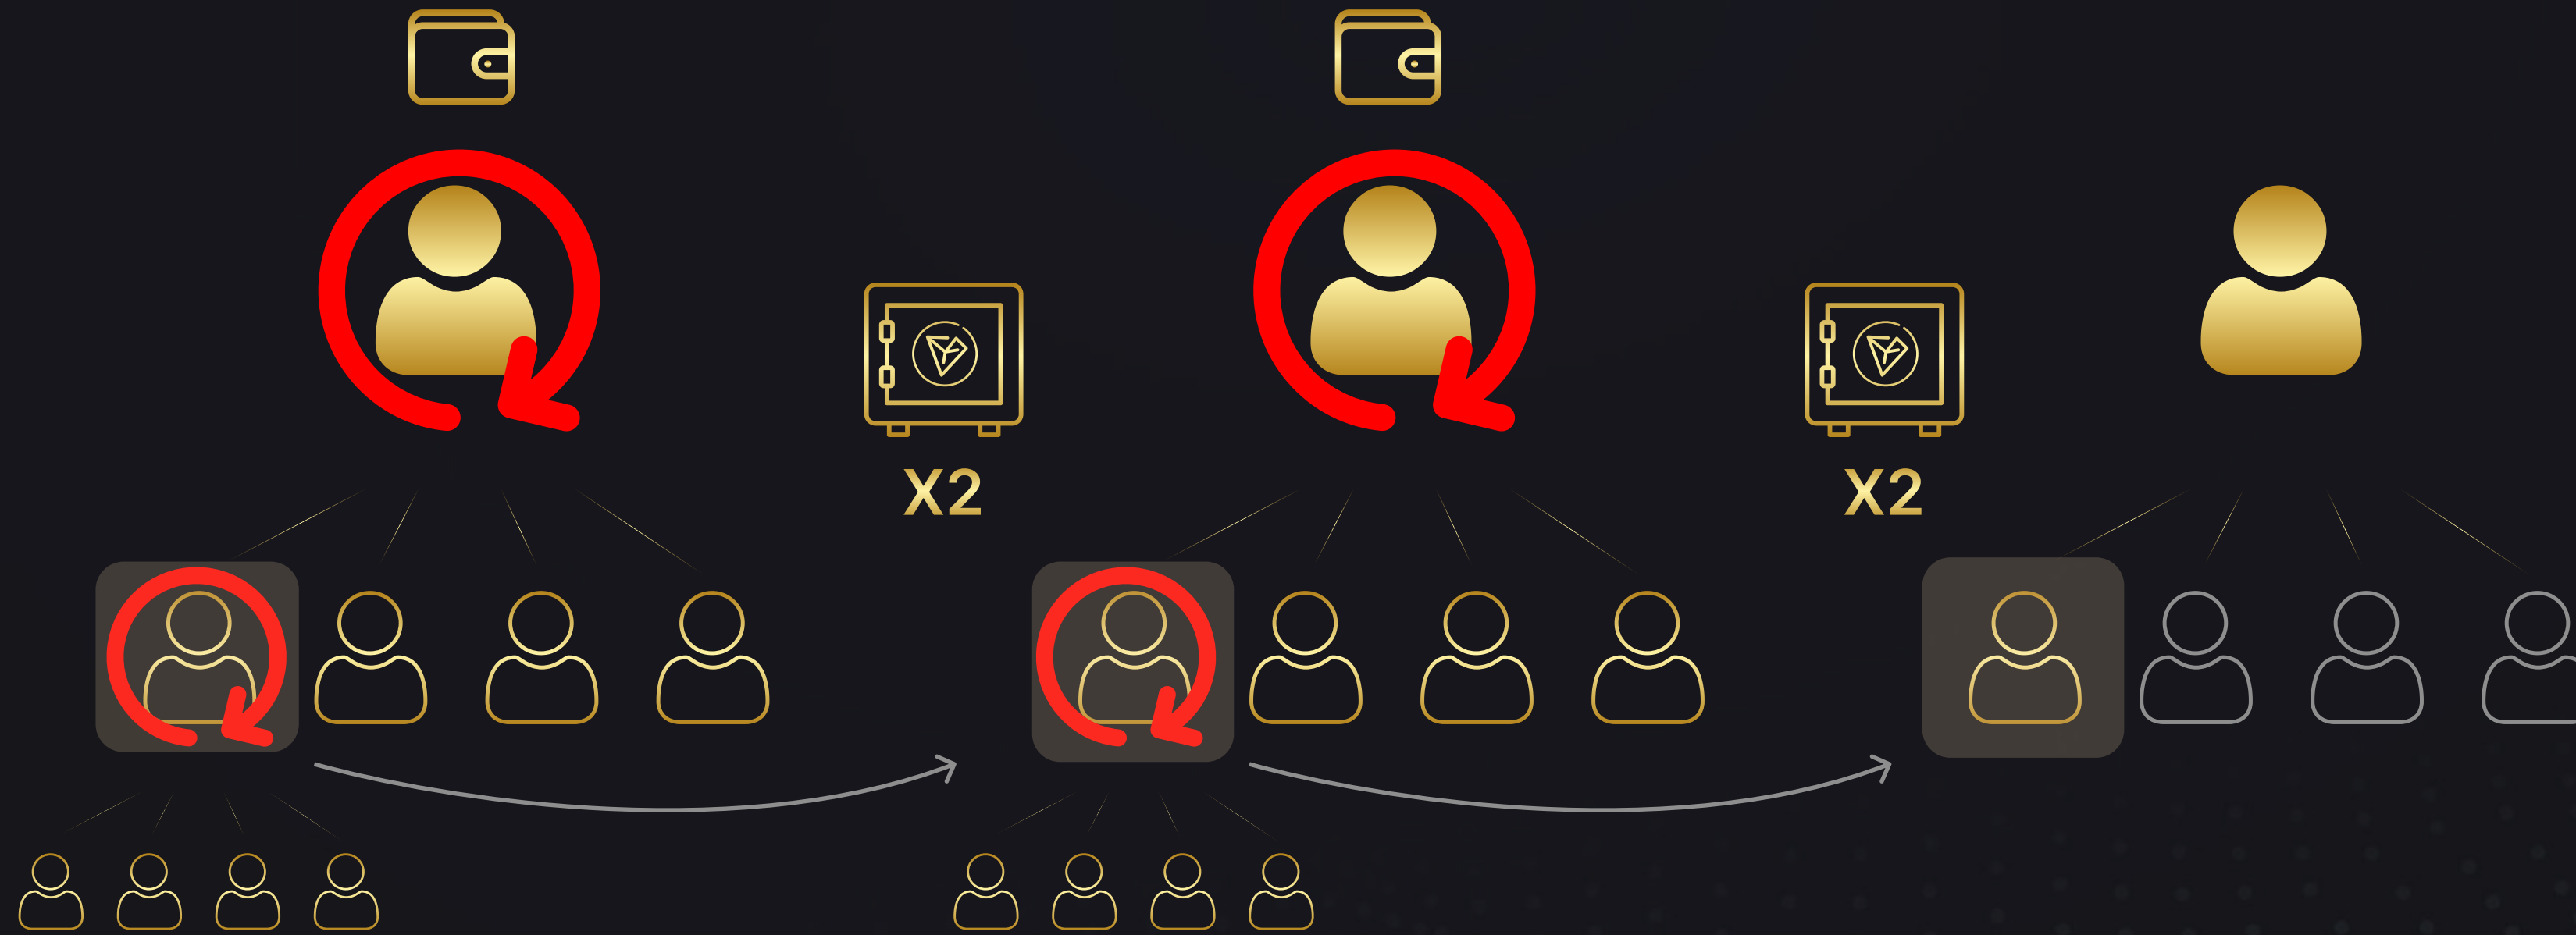

GOLDSET GS5

With each re-filling of GS5, two last places form a reinvestment to reactivate the Goldset of the same cost. Re-activation (reinvestment) of Goldsets of each cost level occurs automatically an infinite number of times.

Your invitees also move to new levels with higher costs of Goldsets and reinvest in those already passed, filling places on your new and old Goldsets.

GOLDSET GS5

Each time your lower-level partner completes the cycle of their Goldset cost level, you receive a reward of 83.3% of the commission fees depending on the amount of the cost of each Goldset, and the partner opens a new cycle in their Goldset again. At the same time, this partner takes a new place below you. Thus, the same partner can occupy several places in a row on your Goldsets.

X2

Completing the full cycle of each set of any cost level brings enough profit to move to the next cost level of the Goldset, by switching to which you have the opportunity to earn two times more than with the previous set.

Activation of more expensive sets and inviting partners to several Goldsets with various cost levels at once accelerates the receipt of your income at times.

There is no expiration date for Goldsets, so you should not be afraid that they will burn or disappear. Each active Goldset at all cost levels constantly brings you income.

How many Goldsets by cost levels can be activated at once? Any amount! As much as you want, even, for example, all at once. It should be borne in mind that you can open the levels only in order: for example, you cannot go to the fifth level without activating the previous sets.

TRANSITION

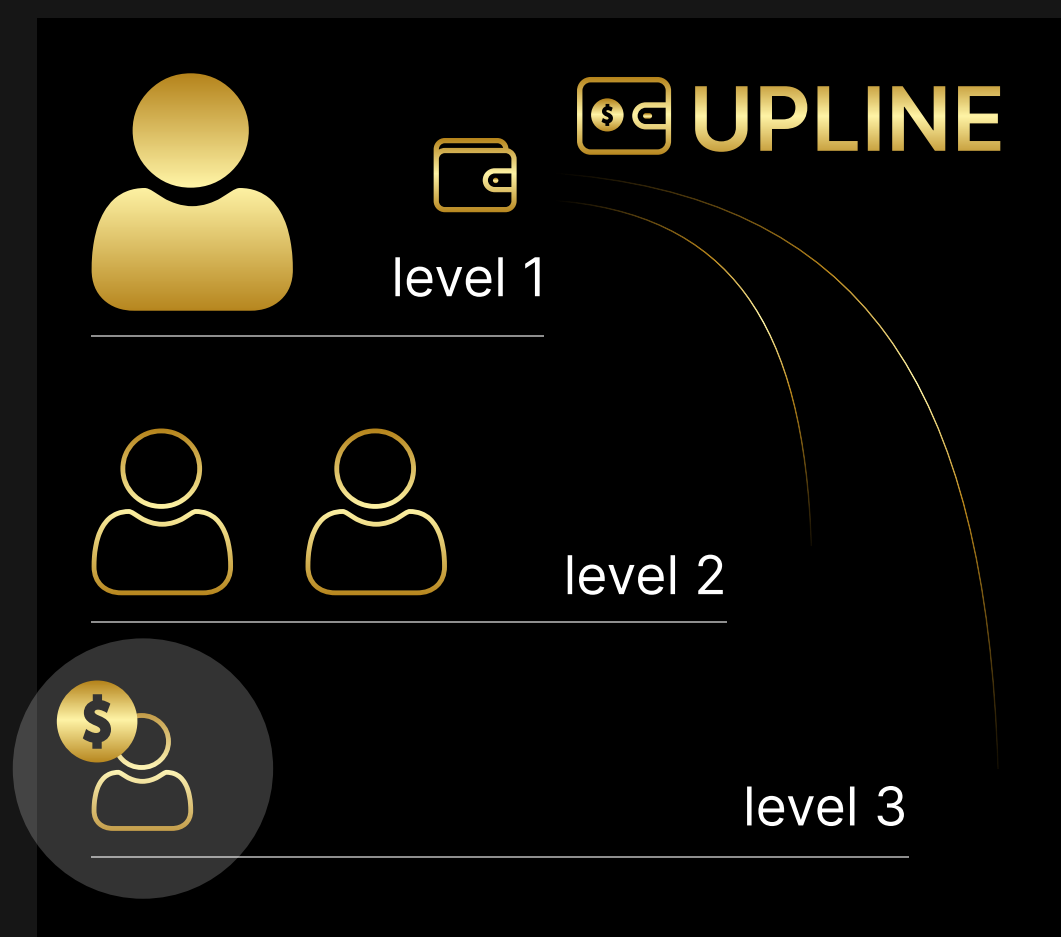

The transition is the activation of the next, more expensive Goldset level. The income from the first cycle of each cost level is enough to move to the next, more expensive level of the Goldset. Your superior partner receives a reward for your place located on a more expensive Goldset provided that they have already activated this Goldset.

1

2

OVERFLOW FROM BELOW

You can temporarily overtake your direct partner by activating Goldsets of more expensive levels that they have not activated yet.

In this case, you will take a place at the level of their nearest superior partner, provided that this partner has the activation of such a Goldset. In this case, the reward will go to them, and not to your direct partner who invited you. After your superior direct partner activates Goldsets of the same cost, you will take a place in the next reinvestments according to the referral link.

For an automatic transition, you need 100% of the cost of each subsequent Goldset. At each first filling, the amount is temporarily blocked on the smart contract for the last places and is formed to switch to a higher-cost Goldset, and the funds are instantly transferred to the wallet of a superior partner when you switch your place.

FOR TRANSITION

Only once, in order to switch to a more expensive Goldset level and reinvest to the set from which the transition was made, the amount on the smart contract is temporarily blocked for:

GS5

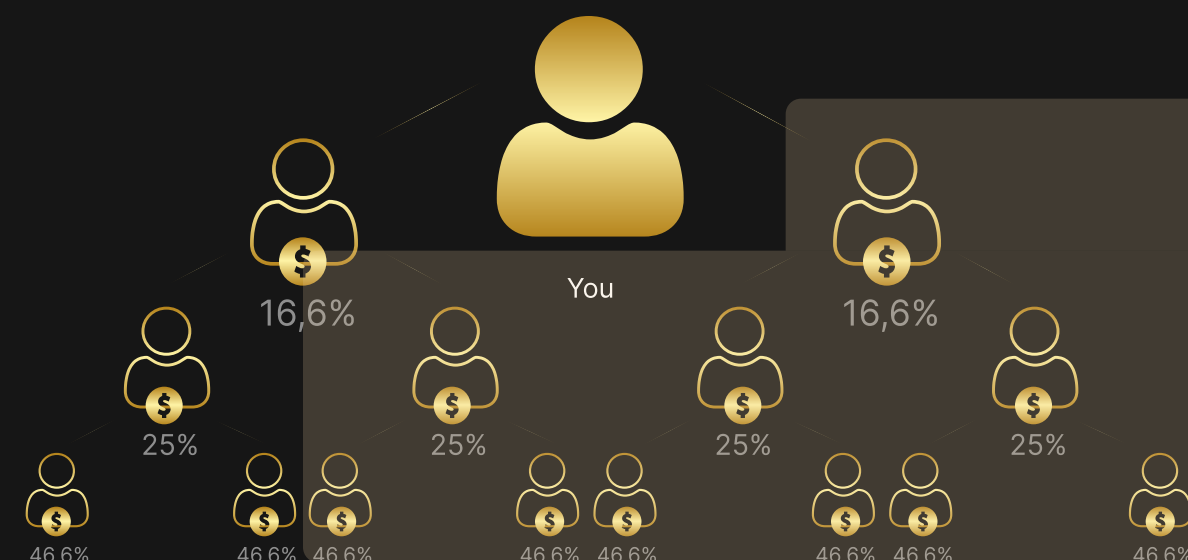

Last 4 places

GS7

Last 3-4 places

GS15

Last 8-9 places

GS31

Last 9-10 places

The balance after using each pool is also returned to the wallet of the program participant.
After switching to a more expensive set, the amounts are blocked only for reinvestment.

REINVESTMENT

Automatic cycles (reinvestment) open the same Goldset (in terms of cost level) a new, thereby constant income continues to be received. This happens automatically as soon as a partner takes the last available place below you. As soon as the level cycle is completed, the next new cycle immediately begins. When the cycle is completed, you occupy an empty place in the Goldset of the same cost of your superior partner and exactly the same Goldset reopens for you with free places for new partners. The reward for each cycle goes to the wallet of your superior partner. Cycles work the same way for your invited partners, and every time their Goldset completes a cycle, you get rewarded for it.

For an automatic cycle of Goldsets, you need 100% of the cost of each given Goldset. At each first filling, the amount is temporarily blocked on the smart contract for the last places and reinvestment is formed for re-activation of a Goldset of the same cost, and the funds in reinvestment are instantly transferred to the wallet of a superior partner. Re-activation of Goldsets (reinvestment) of each cost level occurs automatically an infinite number of times.

FOR REINVESTMENT

GS5

In GS5, the amount is temporarily blocked on the smart contract for the last 2 places.

GS7

In GS7, the amount is temporarily blocked on the smart contract for the last 2 places.

GS15

In GS15, the amount is temporarily blocked on the smart contract for the last 3 places.

GS31

In GS31, the amount is temporarily blocked on the smart contract for the last 3 places.

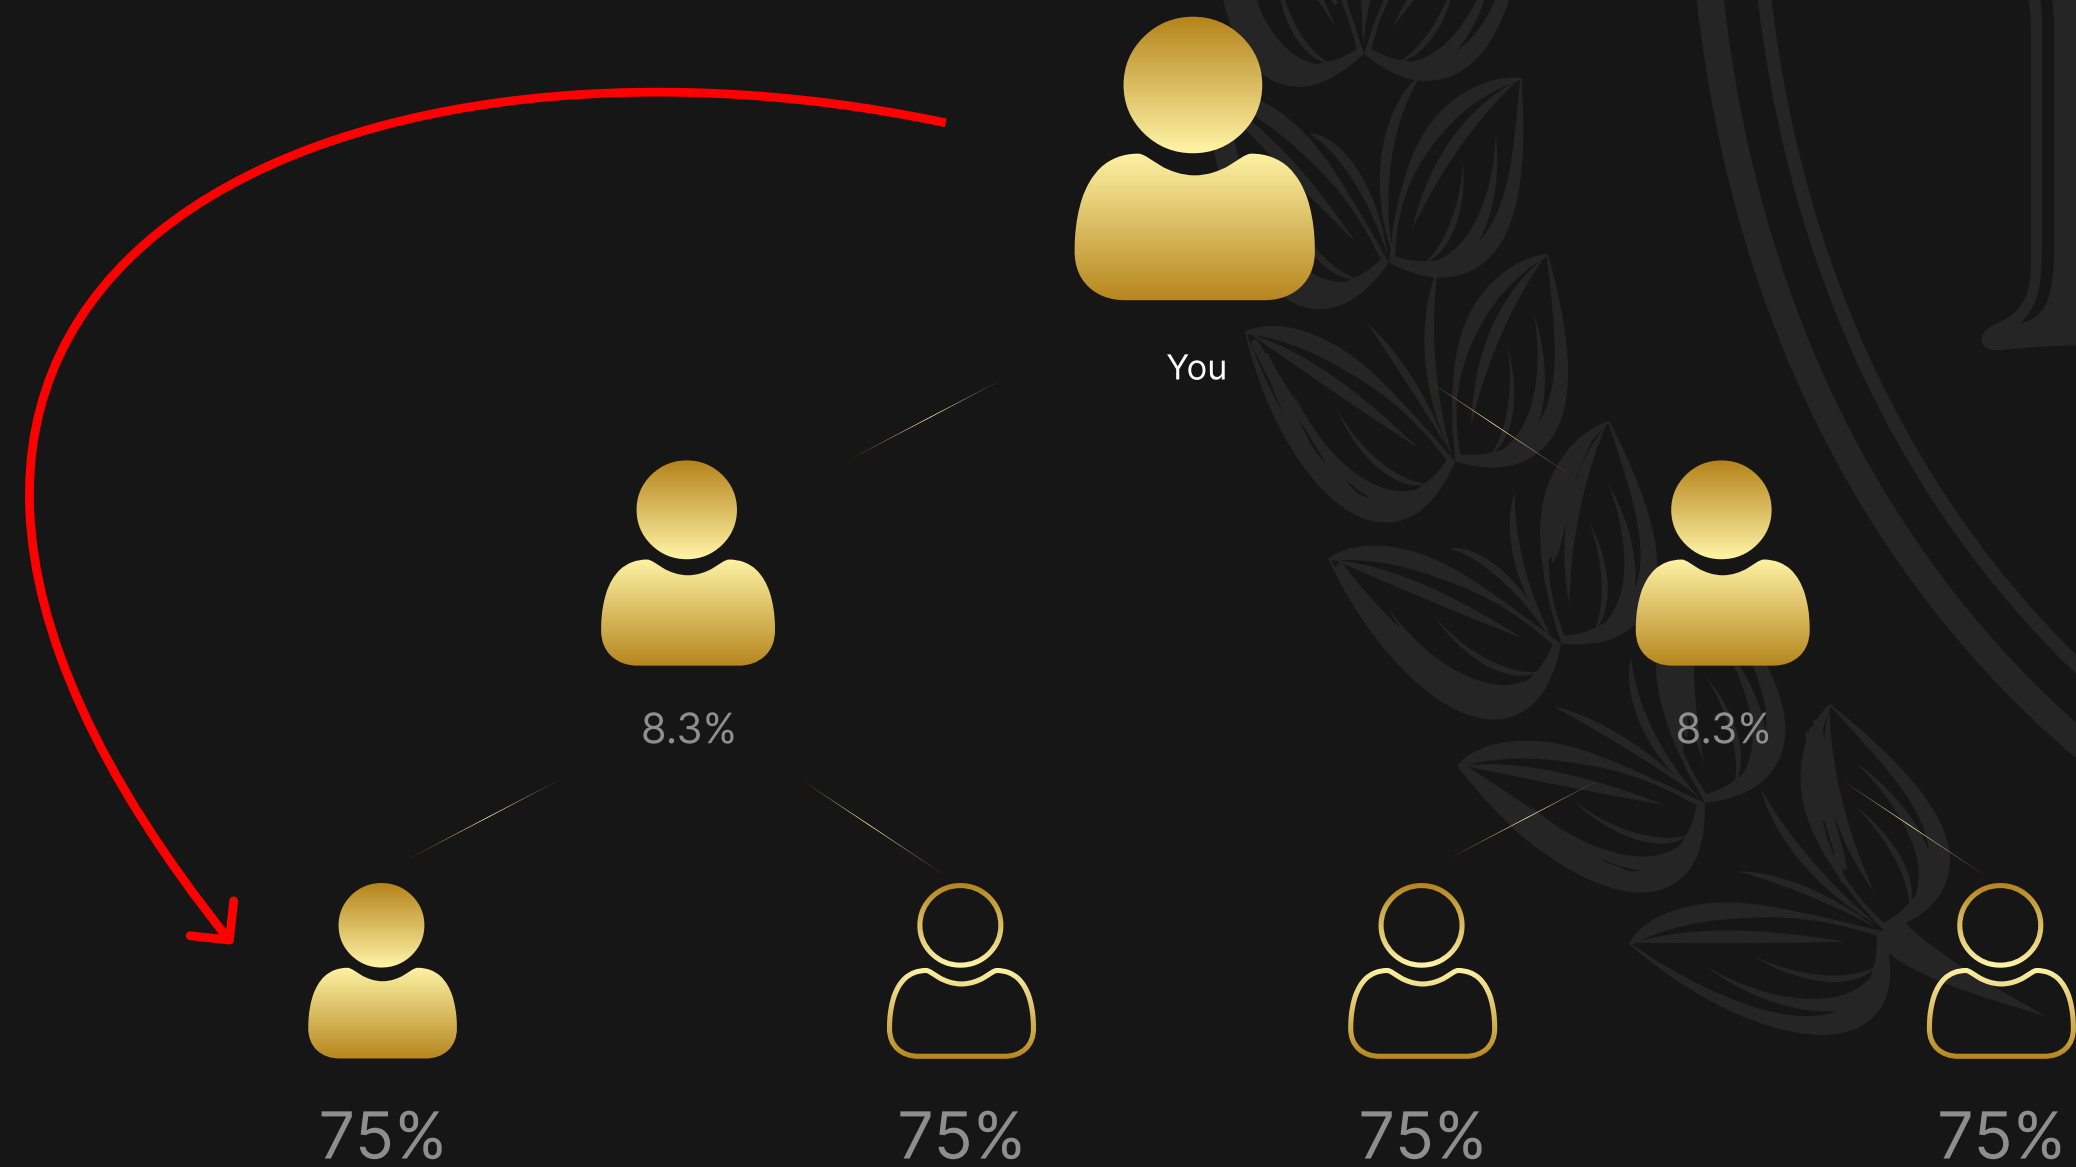

The balance after using each pool is also returned to the wallet of the program participant.

FLOATING

Floating is a process when places on your Goldsets are occupied not only by your personally invited partners, but also by partners invited by other members of your team.

The REAL GOLD 2.0 marketing program allows you to receive additional profit from both your superior and subordinate partners in Goldsets: GS5, GS7, GS15, GS31.

REAL GOLD

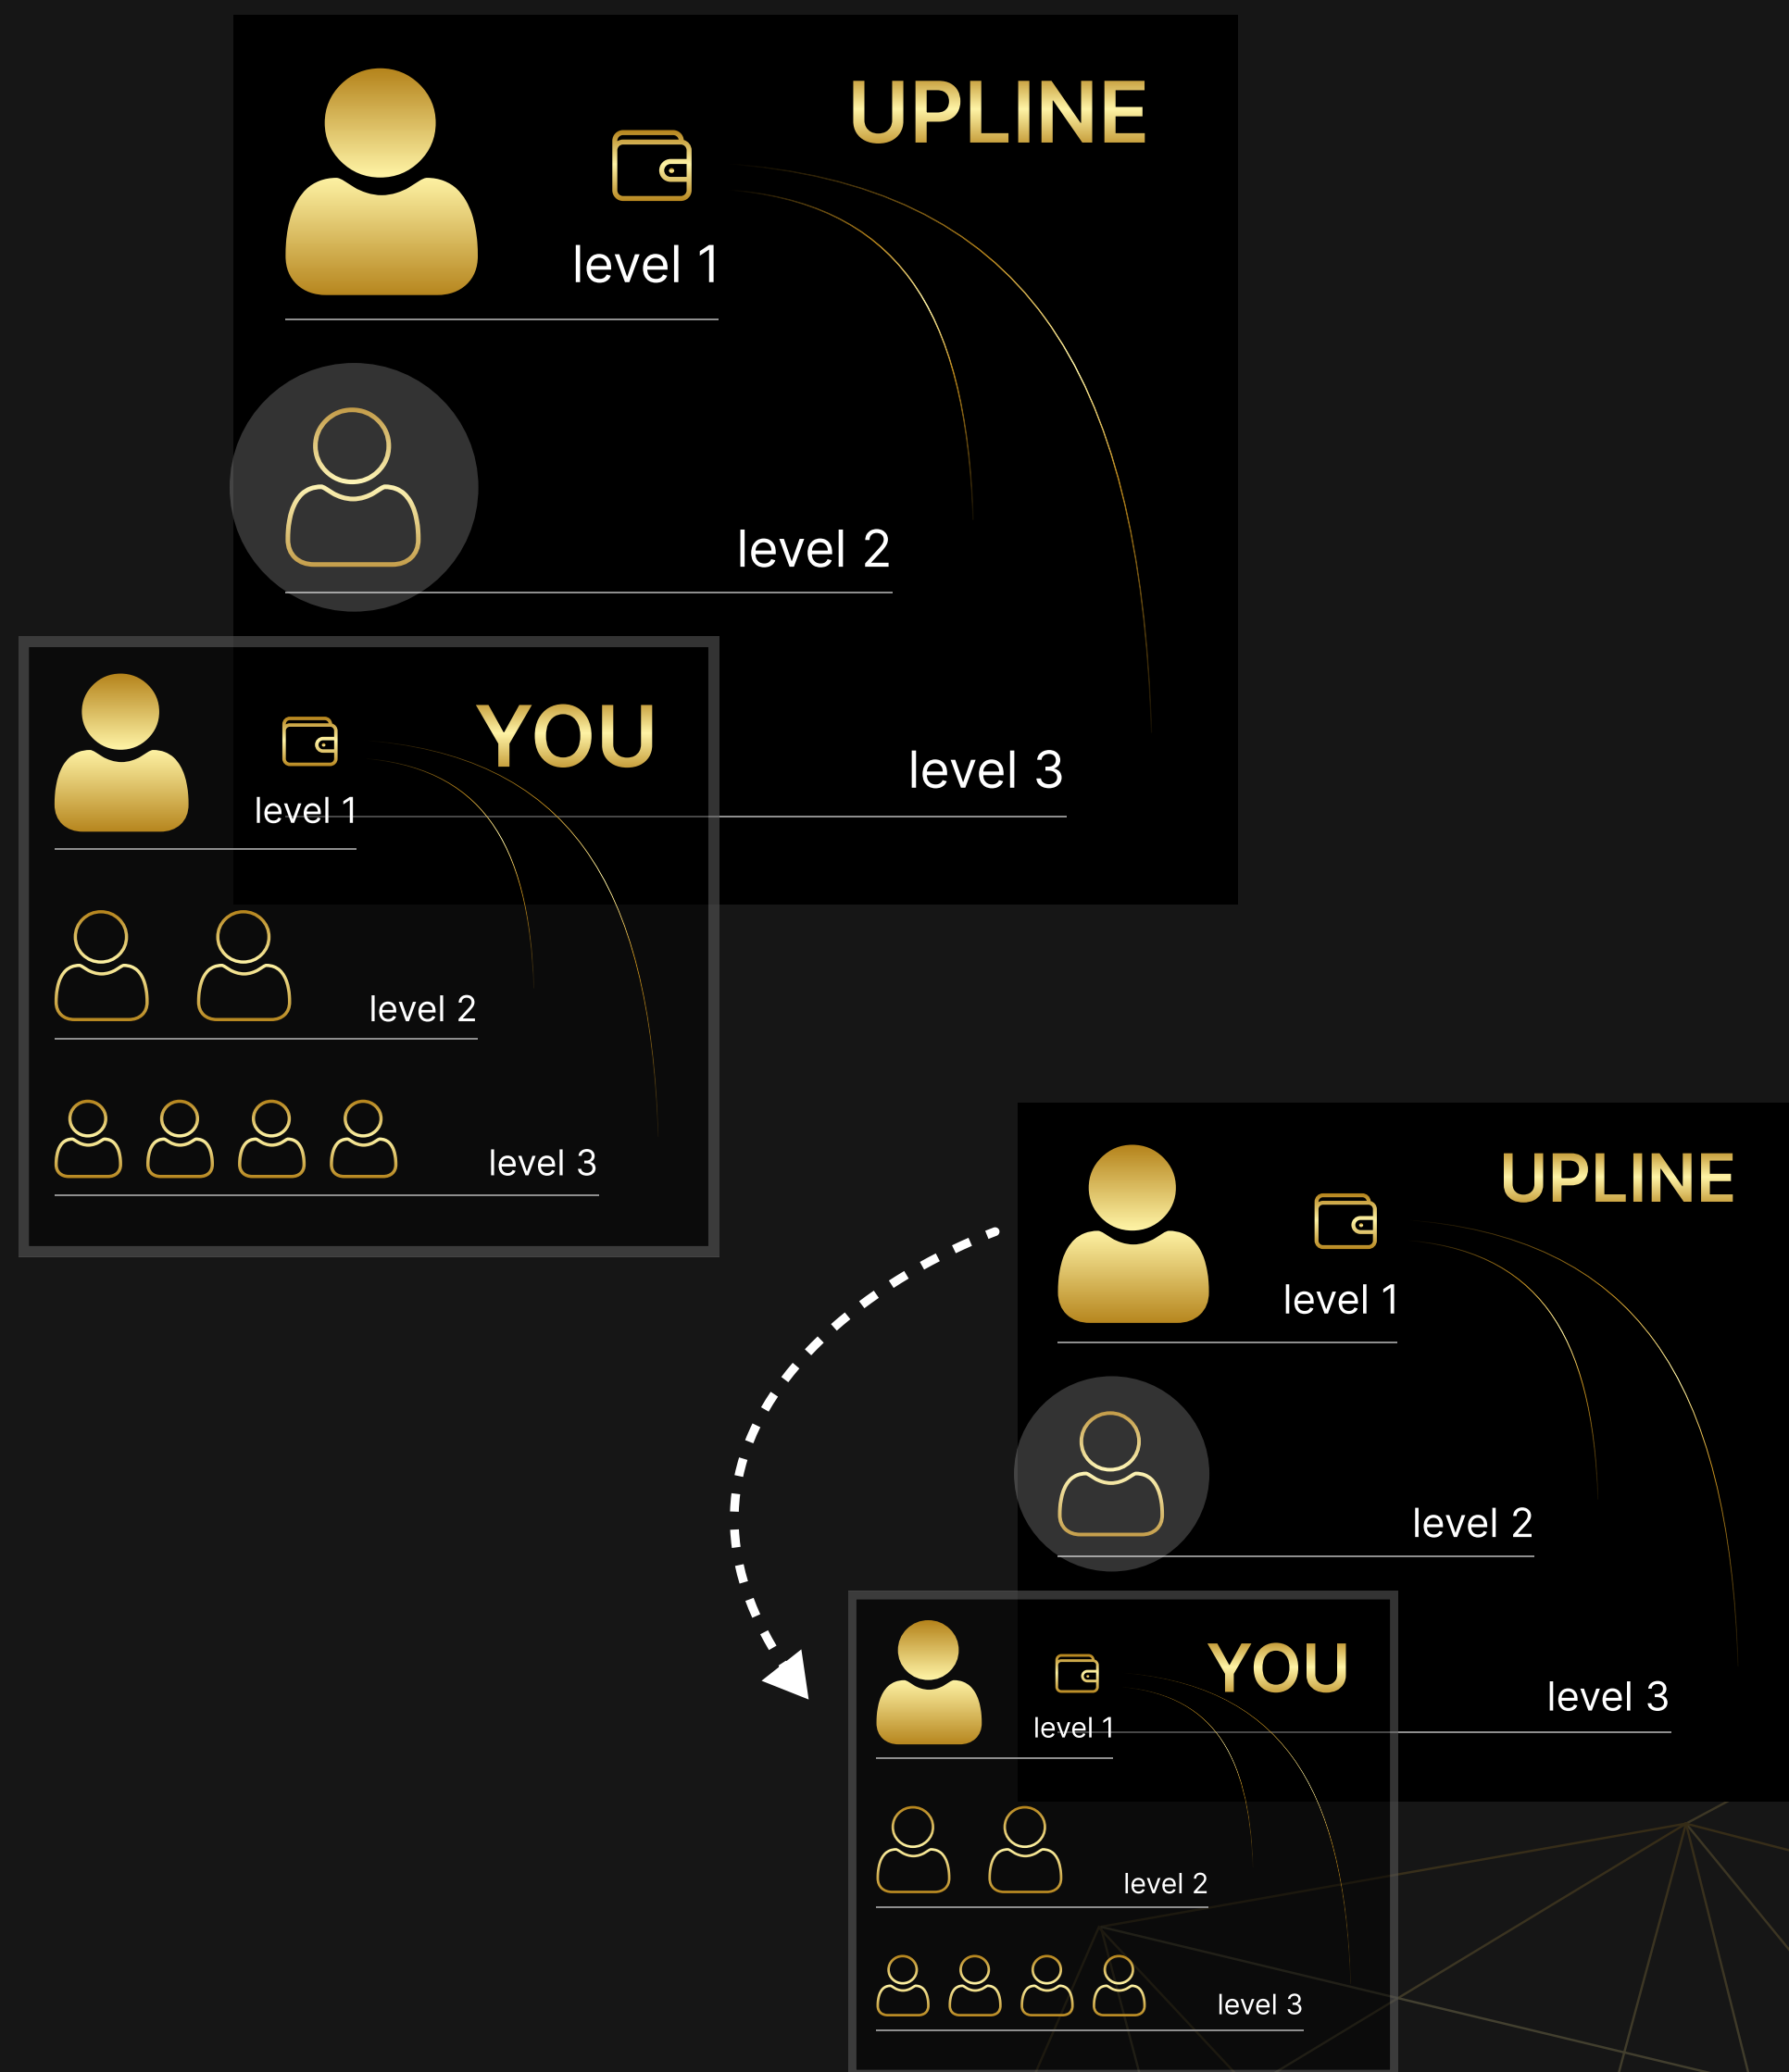

A PERSONALLY INVITED PARTNER

is a partner who has registered using your personal affiliate link. Personal partners occupy the nearest available places at the level immediately after your position.

FLOATING FROM ABOVE

is a personally invited partner of one of your higher-level partners. They occupy the next available places in the Goldset of your superior partner and, accordingly, also fall into your Goldset, but at a higher available level.

1

2

FLOATING FROM BELOW

Floating from below is a personally invited partner of your lower line, who activates more expensive Goldsets.

This is a situation when a partner overtakes their superior and temporarily takes a place directly below you. If your subordinate partner activates this Goldset, this partner will take a place under their direct superior partner in the next cycle.

You can overtake your superior partner by acquiring levels that they have not activated yet. In this case, your commission fees will go to the nearest higher-level partner who has such a Goldset activated.

The referral link allows you returning everyone to their places. This means that when your superior partner activates the required level, you will again take a place below them in the next cycle. Thus, the binding of personally invited partners is preserved forever.

FORMULA FOR SUCCESS

By activating higher cost levels of Goldsets, each time you activate more advanced mechanisms for generating income since with each new cost level of the Goldset the income is twice as much, while the previous levels of Goldsets also continue to constantly generate income with the help of automatic endless reinvestments.

All your invitees, as well as your higher-level partners, endlessly continue to fill places in your Goldsets with the help of floating, following you activating new cost levels and re-activating previous Goldsets creating constant income streams.

There are no limits on the amount of rewards, the REAL GOLD 2.0 affiliate program is a machine for making money.

The rate and volume of your income depend only on your desire, goals, and chosen strategy.

WE HAVE IDENTIFIED 5 MAIN STRATEGIES FOR DEVELOPMENT IN THE PARTNER PROGRAM

Beginner

activation from one to three levels of all types of Goldsets

Enthusiast

activation from four to six levels of all types of Goldsets

Expert

activation from seven to nine levels of all types of Goldsets

Master

activation from 10 to 12 levels of all types of Goldsets

Professional

activation from 13 to 15 levels of all types of Goldsets

THE BEGINNER STRATEGY

activation of 1-3 cost levels
of all types of Goldsets

PROS:

- The opportunity to test all aspects of the affiliate program with a minimum entry threshold and only then decide on the choice of the main strategy
- The opportunity to activate most of the cost levels of Goldsets by invited and higher-level partners

CONS:

- The minimum income possible in the marketing program
- The probability of a small rate of progress through the levels of Goldsets
- The probability of being overtaken by partners, and in this regard, the loss of income

In this case, even if you invite only one or two active participants or if there are active higher-level partners in your structure, they will take you to new levels of Goldsets and income streams gradually filling your Goldsets due to constant floating and endless reinvestments.

However, in this case, these active participants can overtake you by activating higher cost levels of Goldsets faster, and your higher-level partners will receive rewards for their activity on whose Goldsets they will fill places until you activate these levels of Goldsets.

THE EXPERT STRATEGY

activation of 7-9 cost levels
of all types of Goldsets

PROS:

- The ability to quickly build the main source of income
- A balanced ratio of input costs and the rate of investment return

CONS:

- The need for a lot of activity in building a structure for a quick result
- The probability of being overtaken by partners, and in this regard, the loss of income

If your goal is to build a permanent and main source of income, you can choose the Expert strategy and activate 7-9 cost levels of all types of Goldsets with an average entry threshold.

In this case, all the invitees will quickly fill out your Goldsets depending on their activity and their chosen strategy. Due to the fact that you have already activated a solid part of all levels, the entire amount of rewards that were intended for the formation of pools and the automatic activation of higher levels of Goldsets will go directly to your personal wallet.

THE PROFESSIONAL STRATEGY

activation of 13 to 15 cost levels
of all types of Goldsets

PROS:

- Maximum enormous profit
- The opportunity to achieve an incredible level of wealth

CONS:

- The need for maximum work and involvement of large structures to return on investment and achieve maximum results
- A solid amount of initial investment

If you are a professional in your field and your goal is maximum financial well-being, you have a large and active structure of partners who follow you with the same goal, you can choose a Professional strategy by activating all levels of all types of Goldsets, for which you will need solid investments.

In this case, the colossal mechanism will continuously generate huge income streams at all levels of Goldsets depending on your elaboration of strategies with your structure at all levels. Mass starts of invited partners and their invitees on increased strategies, the lack of need to reinvest in increasing levels, constant floating and endless reinvestments of all levels will allow you to return all initial investments as quickly as possible and multiply an infinite number of times at the expense of income of 333% from each GS5 level, 317% from each GS7 level, 467% from each GS15 level, and 817% from each GS31 level.

COMBINED VERSION

You can also develop your own strategies by combining types and levels of Goldsets depending on your specific situation and desire. For example, you understand that you will be able to generate traffic by successfully converting it into your one line of the structure. For the effective use of leads, you can activate one level of all types of Goldsets at the start of the program, as well as all GS5 levels that are filled with direct invitees and ones of each level, from which you will receive 333% of income.
